

Government Department Climate Survey Report: Public Data

Tabulations of all data are publicly available at the links listed in the table below. Each URL links to a “crunchbox” where viewers can create tabulations, cross-tabulations, and bar graphs of the data, with several demographic subsets. The tables have been curated to remove identifying information.

Due to the extensive number of questions, separate crunchboxes were made for a subset of the sections in the survey. Therefore, each crunchbox shows a list of questions that viewers can select. The crunchbox offers several tools to create tables and figures of aggregate data, with various display formats. Filters can be applied to subset the data. These URLs offer viewers the full range of results while preserving anonymity of respondents.
